

Is My Child Ready for Music Lessons?

Ages 3-5

- * can repeat voice inflections and the musicality of another person's voice
- * may stop moving and waits right before a song resolves or a familiar beat drops (brain is mapping the music)
- * experiments with how different objects sound
- * pick out a specific sounds (like a bird outside or a siren in the distance)
- * can sync their body to a steady pulse

Age 5-9

- * excited about music
- * tries to sound out melodies on instruments
- * pretends to conduct music or dances around when their favourite song comes on
- * has a genuine curiosity about playing piano, dancing or singing

As a parent

- * I would love for my child to spend time with a fun, creative, knowledgeable teacher and have that teacher all to themselves at least once a week
- * I would like to arrange in-home lessons rather than travel to lessons
- * I'm ready to give my child a life-changing experience learning music that builds confidence, and encourages expression of creativity and joy
- * we have an 88-key full-size traditional acoustic piano or quality digital piano (smaller size keyboards will not be suitable for lessons)
